Professional Summary

Entry-level Data Scientist with strong skills in Python, data analysis, machine learning, and statistical analysis. Proficient in data preprocessing, exploratory data analysis (EDA), data visualization, and predictive modeling using Pandas, NumPy, Matplotlib, and Scikit-learn. Capable of extracting insights from data, building machine learning models, and supporting data-driven decision-making. Highly motivated to apply data science techniques to solve real-world problems and deliver actionable insights.

Certifications

Certification in Data Science & Machine Learning Entri Elevate, NSDC	March 2025 - Decemeber 2025
Certification in Data Science & Machine Learning Illinois Tech, USA	March 2025 - Decemeber 2025
- Completed training in Data Science and Machine Learning using Python, covering data preprocessing, exploratory data analysis, supervised and unsupervised learning, regression, classification, model evaluation, and web scraping techniques for real-world data collection. - Delivered end-to-end projects including an interactive AI chatbot, applying machine learning concepts, data handling, and deployment fundamentals to create practical, user-focused solutions.	

Education

Calicut University Bachelor of Computer Application	2020 - 2023
---	--------------------

Experience

Geften Cables Pvt Ltd Flutter Developer	March 2025 - Present
- Led end-to-end development of two production-grade mobile applications, owning architecture, feature delivery, performance optimization, and Google Play Store & Apple App Store deployments with full release management. - Resolved critical production issues and high-severity bugs through rapid root cause analysis and stable fixes under tight timelines, ensuring minimal downtime and consistent user experience during crisis situations.	
First Logic Meta Lab Pvt Ltd Software Developer	June 2023 - February 2025
- Developed and maintained high-performance cross-platform Flutter applications, improving app launch time by 30 percent through codebase optimization and adoption of modern architectures and best practices. - Mentored and guided more than 5 junior developers while introducing new technologies and frameworks, improving code quality, team productivity, and long-term application maintainability.	

Projects

Conversational AI Chatbot Github Link	December 2025
Google Colab, NumPy, Pandas, FAISS, Scikit-learn, Hugging Face LLMs	
- Designed a conversational AI chatbot using NLP techniques such as text preprocessing, TF-IDF vectorization, and cosine similarity to deliver accurate automated responses. - Implemented a Retrieval-Augmented Generation (RAG) pipeline using document chunking, vector embeddings, and FAISS to enable efficient semantic search and improve response relevance across large knowledge bases.	

Geften E.E.A | [Playstore Link](#)**March 2025**

Flutter, Dart, Firebase, Node.js, Rest APIs, AWS

- Architected a mobile application using Flutter, Firebase, Node.js, and AWS, enabling QR/code scanning for real-time reward tracking and redemption. Implemented secure backend integration, cloud services, and database management to support loyalty programs, user profiles, and accurate reward processing.

Gefmart B2B Retailer App | [Playstore Link](#)**March 2025**

Flutter, Dart, Firebase, Node.js, Rest APIs, AWS

- Built a B2B e-commerce platform using Flutter, Firebase, Node.js, and AWS, enabling product browsing, firm-specific pricing, and reward point earning and redemption through QR/code scanning. Integrated secure backend, cloud database, and loyalty tracking to improve partner engagement, pricing transparency, and sales efficiency.

Blithe Event Manager | [Playstore Link](#)**January 2024**

Flutter, Dart, Firebase, Node.js

- Engineered a social events application using Flutter, Firebase (Firestore, Authentication, Storage, Cloud Messaging), and Node.js, enabling real-time chat, secure authentication, media uploads, and push notifications. Implemented scalable backend logic and cloud functions to support personalized recommendations, automated notifications, and efficient data processing.

Mall of Abayas - Online Abaya Store App | [Appstore Link](#)**October 2024**

Flutter, Dart, Firebase, Node.js, Rest APIs

- Created a Flutter application with user and admin modules, integrating Firebase (Firestore, Authentication, Storage, Messaging), Node.js Cloud Functions, and REST APIs to enable secure authentication, real-time updates, and efficient order and product management.

Technical Skills

Data Science Tools : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, Hugging Face, PySpark, MLflow, Supervised Learning, UnSupervised Learning, Exploratory Data Analysis, Model Evaluation, Data Visualization, Feature Engineering, Web Scraping.

ML Methods : Linear & Logistic Regression, Decision Trees, Random Forest, KNN, SVM, K-Means, Hierarchical Clustering, PCA.

Evaluation : Accuracy, Precision, Recall, F1-Score, Confusion Matrix, ROC-AUC, MAE, MSE, RMSE, Cross-Validation.

Developer Tools : Google Colab, Jupyter Notebook, Android Studio, VS Code, Google Cloud Platform, Firebase, MongoDB, AWS.

Languages/Frameworks : Python, Flutter, Dart, Node.js, MVC, Riverpod, Bloc, Sqflite, Rest APIs, Git & Github.

Soft Skills

- **Problem-Solving** – Solving problems and coming up with effective solutions.
- **Communication** – Communicating ideas clearly to technical as well as non-technical individuals.
- **Team Collaboration** – Collaborating in a team or cross-functional team environment effectively.
- **Time Management** – Working under timelines and handling multiple assignments or projects simultaneously.
- **Adaptability** – Picking up new tools, technology, or adapting to project modifications promptly.
